32	17	43 min	0%
TICKETS	HIGH PRIORITY	MEDIAN RESPONSE	MET RESPONSE TARGET

EXECUTIVE SUMMARY

32 tickets this week; not enough history to call a trend (needs 8+ tickets in each of two weeks and 4+ active days). IT & Medical Tech is the largest category with 15 of 32 tickets (47%).

High-priority tickets make up 53% of the week (17 of 32); on-call capacity is under pressure.

Median first response was 43 min (mean 43 min, worst 43 min) across 1 answered ticket; 31 still unanswered. 0% of answered tickets met their proposed response target (High 15 min, Medium 120 min, Low 480 min). Response performance was well below target for High priority tickets.

31 tickets are still Open (unanswered) out of 32.

Outlook: about 224 tickets are expected over the next 7 days, but with only 1 day of history no error margin can be quoted. Treat this as a planning aid, not a prediction.

KEY FINDINGS

FINDING	EVIDENCE	CONFIDENCE
Volume trend	32 this week, 0 last week	insufficient-data
Largest category	15 tickets, 47% share	solid
High-priority load	17 High, 53% of week	solid
First response	median 43 min, mean 43 min, n=1	low-sample
Response targets	0% met, n=1	low-sample
Target gaps	well below: High	low-sample
Unanswered	31 of 32 Open	solid
